

Dr. Reddy's Lab

Profile: Technical trainee(chem), Operations and production(mech)

Number of offers: 6

Eligible Departments: Chemical, Mechanical

CGPA Criteria: 7

Process involved: Online Test, PI

Test details:

- **Mode of Test:** Online
- **Round1:** Online Test – Core (30 questions, 30 min), Chemical- mostly from Polymer chemistry, FM, MT, HT etc. , Mechanical – Mostly from SOM, Manufacturing, IC engines, thermal engineering, quality management etc.
- **Round2:** Technical Interview + HR Interview combined

Preparation for process: Be thorough with your core fundamentals for Online test. For PI, be prepared with your internship/projects details you have done in core. Revise your favorite two subjects or learn any 2 subjects properly and be prepared for numerical problems in it. Be yourself in the overall process.

JOB DETAILS:

- **A typical day in a role:** At first all the people joined Dr.Reddy's go through a 1 year training period. Tracking down the progress and completing the day to day tasks which were given. Using word and powerpoint for the tasks. (managerial post)
- **Expectations vs reality:** Should have a relevant experience in pharmaceutical company or else it would be difficult to grasp knowledge. Training is given but without the experience and knowledge in pharmaceutical domain you face problems.
- **The Work culture, employee benefits, etc about the company:** Has a friendly and cooperative job environment. Management is very good and they are also very helpful. Health insurance and covid-19 vaccine are some benefits.
- **Any advice from your side:** Maintain a good cgpa and do intern in a core(pharmaceutical) company which gives experience and higher chances to get into Dr.Reddy's
